# ABOUT US

*Gulf Coast Material Handling provides complete analysis, design, engineering, installation and service of material handling and storage systems. GCMH is structured to respond quickly to changes and trends and are always striving to find better materials and methods to improve the overall productivity. We can survey your facility and provide recommendations for improvement in productivity, space utilization, inventory control and customer service, thus reducing overall costs. GCMH is dedicated to the successful and practical implementation of material handling concepts for our customers.*
